Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/735,094	Applicant(s) STARNES, CHARLES	
	Examiner Kevin T. Truong	Art Unit 3734	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Note: This is in response the Applicant's remarks filed 08/01/2008.

Response to Appeal Brief

1. In view of the Appeal Brief filed on 10/12/2007, PROSECUTION IS HEREBY REOPENED. A new ground of rejection set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below:

/(Jackie) Tan-Uyen T. Ho/

Supervisory Patent Examiner, Art Unit 3773.

Response to Amendment

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 103

Art Unit: 3734

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-3, 5-11, 13-15, and 17-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Morita (US 5385571) in view of Stanners (US 5403288).

Morita discloses a lancet body (12) having a needle tip (16) projecting from the distal end of said body (12); a generally cylindrical cap (14) connected to said needle tip (16) by a frangible junction (in other words, cap (14) is integrally molded with lancet body (1)); wherein said cap (14) having at least one tab member projecting therefrom, an opening (22 and 38 as shown in fig. 9) sized for engagement with the lancet distal end (at 20) and an interior axially projecting hub (at 42) for receiving the needle tip (16) (see fig. 12); the opening (22 and 38 as shown in fig. 9) can be facing in distal direction away from the lancet body or being coaxially aligned with the shaft. However, Morita lacks an interior projecting post disposed within the opening of the cap, whereby the needle piercing tip is embedded with the interior axially projecting post in the pre-use configuration.

Stanners teaches in figures 26 and 27, that it is known in the art to have interior projecting post (141) disposed within the opening of the cap(140), whereby the needle piercing tip (100) is embedded with the interior axially projecting post (141) in the pre-use configuration.

For this reason, it would have an obvious to one of ordinary skill in the art at the time the invention was made to provide the Morita's cap having an interior projecting post disposed within the opening of the cap, whereby the needle piercing tip is embedded with the interior axially projecting post as taught by Stanners in order to maintain a clean needle end prior to use.

Response to Arguments

4. Applicant's arguments filed 05/07/2007 have been fully considered but they are not persuasive. Applicant's arguments with respect to claims 1, 5, and 18 have been considered but are moot in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin T. Truong whose telephone number is 571-272-4705. The examiner can normally be reached on Monday-Friday from 8:00 AM to 4:30 PM..
